Umomoku is an unobtrusive and simply designed line of comfortable outdoor furniture intended for lounging. It was originally conceived for Mulini Beach in Rovinj and subsequently redesigned for sales in furniture stores. The furniture construction consists of broad and narrow wooden slats of a square cross section that create a recognizable graphism in the design. Rich, sumptuous cushions create the visual identity of the entire collection. Modular nature of the Umomoku collection allows the users to combine multiple elements according to need, but also their individual use, both in the exterior and interior. It consists of an armchair, sofa, coffee table, bench, deck chair and a tray.
